

TalkToText Pro — Meeting Intelligence Report

Meeting: Q4 Product Roadmap & Executive Strategy | **Style:** Executive Summary | **Language:** English | **Date:** 2026-08-15 07:04:36

Executive Summary

In today's sprint planning session, the team focused on addressing high-priority customer feedback, with specific assignments and strategic decisions made to enhance product performance and documentation. The shift to AWS US-East for cloud deployment aims to optimize latency, reflecting a proactive approach to customer satisfaction and operational efficiency.

Key Discussion Points

- Review of high-priority customer feedback tickets.
- Assignment of Mark to resolve audio upload latency issue by Wednesday.
- Jessica tasked with drafting API documentation and preparing test suites for release version 2.4.
- Decision to shift cloud deployment to AWS US-East to reduce ping times.

Decisions Made

- ✓ Shift cloud deployment to AWS US-East.

Action Items & Deliverables

Assignee	Task Description	Deadline	Priority	Status
Mark	Resolve the audio upload latency issue	Wednesday	High	Pending
Jessica	Draft API documentation and prepare test suites for release version 2.4	End of Day	Medium	Pending
Usman	Deploy caching service to staging	Next Friday	Medium	Pending

Sentiment & Collaboration Assessment

Overall Tone: Collaborative and focused on solutions | **Positive:** 80% | **Neutral:** 15% | **Negative:** 5%

Insights: The team demonstrated strong alignment on priorities and a commitment to addressing customer feedback, fostering a constructive atmosphere for collaboration.
