

# TalkToText Pro — Meeting Intelligence Report

Meeting: new | Date: 2026-08-15 04:40:26 | Language: English

## Executive Summary

The team aligned on project deliverables and technical milestones. Specific assignments were designated to team members with clear execution timelines.

## Key Discussion Points

- Review of project milestones and upcoming feature deliverables.
- Architecture updates regarding backend database and authentication workflow.
- Timeline alignment and client requirement priorities for the next release cycle.

## Key Decisions

- ✓ Approved the beta release schedule for next month.
- ✓ Prioritized export feature deliverables ahead of client review.
- ✓ Scheduled automated security and performance testing.

## Action Items & Deliverables

| Assignee | Task Description                                      | Deadline     | Priority |
|----------|-------------------------------------------------------|--------------|----------|
| Mark     | Complete UI components and client review deliverables | Friday       | High     |
| Jessica  | Finalize database schema and API integration models   | Next Tuesday | Medium   |

## Sentiment & Tone Analysis

**Overall Sentiment:** Positive (88% confidence) | **Tone:** Goal-Oriented & Collaborative

**Insights:** Discussion demonstrated clear accountability with distinct deadlines.

## Cleaned Transcript

Hello all. In today's sprint planning, we reviewed the high-priority customer feedback tickets. Mark is assigned to resolve the audio upload latency issue by Wednesday. Jessica will draft the API documentation and prepare test suites for release v2.4. We mutually agreed to shift the cloud deployment to AWS US-East for reduced ping times.
